Education

University of Michigan-Flint Flint, MI
B.S. Software Engineering, GPA 4.00 *Expected May 2028*

- University Honors Program, Dean's List (every semester), Hope Fund Scholar

Experience

Engineering Intern June 2026 - August 2026
Swift Current Energy *Boston, MA*

- Cut multi-scenario simulation time from 15 minutes per scenario to 15 minutes total with Python notebooks that run all scenarios in one Tyba pass.
- Delivered the notebook as a reusable tool the engineering team adopted for Tyba model runs on utility-scale solar and storage projects.
- Modeled financial and performance forecasts for utility-scale projects using PVsyst, Tyba, Excel, and Power BI.
- Drafted feeder layouts and multi-vendor panel balancing for utility-scale solar and wind plant designs in AutoCAD.

Undergraduate Research Assistant January 2026 - Present
University of Michigan-Flint *Flint, MI*

- Developing a Unity VR escape-room game linked to IoT sensors that stream real-time inputs from the physical room, researching how VR can make escape rooms accessible.
- Integrating an LLM that lets players generate their own escape-room themes and games inside the VR experience.

Projects

Wafa | *Next.js, TypeScript, PostgreSQL, Supabase* September 2026

- Built a multi-tenant loyalty platform where customers join a no-app stamp card in 15 seconds, piloted with a local café.
- Isolated each business's data with PostgreSQL row-level security, proven by 36 direct-database tests within a 341-test suite.

MagicManual | *Hack Dearborn 2026, React Native, Three.js, Gemini, Supabase* October 2026

- Shipped an app in 24 hours with a team of 4 that turns furniture manuals into narrated, animated 3D walkthroughs.
- Engineered Supabase sign-in and saved projects with row-level security, plus tests proving users cannot access others' builds.

Personal OS | *React, Node.js, SQLite, Ollama* October 2026

- Created a local-first AI planning app that turns daily intentions, tasks, and reflections into an explainable alignment score.
- Designed a context compiler feeding a local LLM only relevant memories, with validated JSON output and rule-based fallbacks.

Leadership & Campus Roles

Vice President April 2025 - Present
International Student Organization *Flint, MI*

- Coordinated cultural programs and engagement events with 100+ participants

Intramural Supervisor August 2025 - Present
UM-Flint Recreational Services *Flint, MI*

- Supervise basketball, soccer, and volleyball leagues, training student referees and resolving game-day conflicts

International Student Ambassador August 2025 - Present
UM-Flint International Center *Flint, MI*

- Guide prospective and new international students through admissions, campus tours, and orientation

Skills

Languages: Python, TypeScript, JavaScript, C++, SQL, HTML, CSS
Frameworks: React, Next.js, React Native (Expo), Node.js, Express, TensorFlow, Keras, Three.js, Unity
Data and AI: PostgreSQL, Supabase, SQLite, NumPy, pandas, Power BI, Google Gemini API, Ollama
Tools: Git, GitHub, Vitest, Playwright, AutoCAD, PVsyst, Tyba
Spoken: English (Native), Arabic (Native), Spanish (Beginner)

Certifications

- Introduction to Agents, Mercor (October 2026)
- AI Programming with Python and TensorFlow Nanodegree, Udacity (2024 - 2025)
- Front-End Web Development Nanodegree, Udacity (2025)
